Universitas Islam Negeri Alauddin Makassar

As-salāmu 'alaykum Warahmatullāhi Wabarakātuh

Dear respected Professor,

SUBMISSION OF PAPER FOR CONSIDERATION FOR PUBLICATION

TITLE: Does Quranic Recitation Work on a Non-Audible Cell? An experimental study in a monolayer cells culture model.

May you be in the best of health and circumstances amidst this COVID-19 pandemic.

On behalf of my postgraduate student, attached are the manuscript and files containing relevant information for consideration for publication in your reputable Journal of Islam and Science.

Based on our research, there has been a dearth of modern scientific literature addressing the effect of Quranic recitation on the physical context of beings compared to a psychological or spiritual dimension. Muslims believe that the Holy *Qur'ān* is *Kalamullah* (the words of God). This study distances itself from arguing the truthfulness of the *Qur'ān*. Instead, it is an effort out of curiosity to appreciate the Creator's greatness from a scientist's perspective. It is always room for improvement in seeking knowledge. In this study, the monolayer cultured cells exposed to various sounds were evaluated from macroscopic to molecular levels to cover a broad range of biological disciplines such as anatomy, physiology, biochemistry, biotechnology, genetics, molecular biology, and life sciences. Both qualitative and quantitative results were presented for more scientific rigour. This present study also aims to uncover new findings complementing the existing human knowledge in modern science towards sustainable development goals. It is hoped that the outcomes from this study could benefit and contribute to society's good health and well-being.

We acknowledge that this work has not been published previously except in the form of an abstract, a published lecture, or an academic thesis that is not considered for publication elsewhere. The manuscript is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out, and that, if accepted, it will not be published elsewhere in the same form, in English or any other language, including electronically without the written consent of the copyright holder.

Thank you very much for your kind attention and time in considering this submission.

Stay safe. *Wassalām*.

Munirah
