LETTER FROM EDITORS

Taufiq Mathar & Hijrana

The final publication of Volume 10 Issue 2 in 2022 indicates that Khizanah al-Hikmah has reached 1 decade of publication. During that time, there were as many as 184 published articles. The roles of all editors and reviewers, whether from National or International colleagues, have contributed significantly to the progress of this journal. We lost an editor, alm. Irmawati, who passed away a few months ago, we hope she was blessed and rewarded the best place by the Almighty Allah SWT, and the family she left behind, his husband and 2 twin daughters, can sincerely accept it.

In this year's final edition, we publish nine articles and 1 article from the results of the Indonesian Academic Library International Conference, which was held in Mataram several months ago. All published articles cover a variety of topics. Starting with the issue of convergence, GLAMS, which until now, there has been no concrete effort to get there. This was followed by writing about the library's experience with using e-DDC. Three articles use a bibliometric approach with different study objects. Two other articles describe the role of IPI and the curriculum mapping of the Library Science study program. While one article about archives describes a concept that may be considered new to this field. And one article from the conference mentioned above represents a repository integration system that can be offered to undergraduate-level research scientific data.

Processing and publishing these ten articles certainly has used the energy and thoughts of all editors/reviewers working. Once again, we thank you very much and highly appreciate the efforts you have put in.
